WORK EXPERIENCE

Syniotec (06/2022 - 04/2024) ~ 1y 8m

Backend (Nest/AWS/Postgresql/Mongo/Kafka/Elastic)

Designed and maintained microservices architecture

- Utilized Kafka for event-driven communication.
- Integrated Elasticsearch for advanced search capabilities.
- Leveraged various AWS services (EC2, S3, RDS, IAM, CloudWatch, API Gateway) for robust cloud infrastructure.

Developed and enhanced backend features:

- Implemented a dynamic form builder to streamline data collection.
- Created functionality for generating PDF and Excel reports.
- Built a comprehensive notification system for real-time updates.

Citycom (03/2022 - 06/2022) ~ 3m

Fullstack (Node/React/AWS/Mysql)

Designed and implemented scalable fullstack applications using Node.js for backend and React for frontend

Employed AWS Lambda to build serverless functions for scalable and cost-effective solutions

Updated Messaging System, enhanced and optimized the messaging system to improve reliability and performance.

Developed and maintained transactional microservices to ensure efficient and accurate data processing

WebApp (03/2020 - 01/2022) ~ 2y

Fullstack (Node/React/Mysql)

Designed and implemented a comprehensive CRM system to streamline customer interactions and improve business relationships.

Created multiple fully functional websites, each with its own customized admin panel for seamless content and user management.

Maintained and enhanced three existing projects by modifying and adding new functionalities to improve performance and user experience.

Managed DevOps tasks to ensure smooth development, deployment, and operation of applications.

Fertimo (01/2019 - 01/2020) ~ 1y

Frontend Developer (React/Redux)

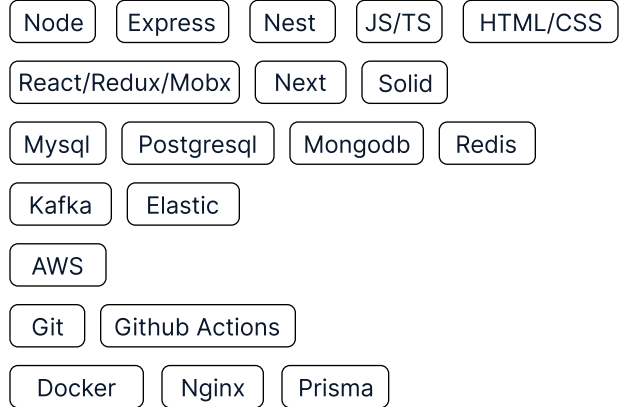

Focused primarily on building and enhancing the project's user interface and user experience using React.

Managed complex state and business logic using Redux, with a particular emphasis on analytics functionality.

Developed responsive and intuitive UI components to improve user interaction and engagement.

Optimized frontend performance for faster load times and smoother user experiences.
